

Instructions to reproduce this analysis

Wednesday, December 4, 2019

8:19 PM

Steps:

1. Fork the entire repository and copy the files to local system
2. Open ".\virtual_coach\1. Database Connections\virtual_coach_database_connections.ipynb"
3. Set the working directory as ".virtual_coach\2. Activity Datasets"
4. Remove the other locations where the working directory is being set
5. Run the database and table creation codes in order
6. Run the plot generation codes
7. Open ".virtual_coach\4. Helper Functions\virtual_coach_helper_functions.ipynb"
8. Set the working directory as ".virtual_coach\2. Activity Datasets"
9. Define the utility functions before running them
10. Cite the owners if you are using our work further, it motivates us
